

**Key Formulae**  
You need to learn your key formulae. Take two minutes each day to copy them out, you will soon remember them. Put them on your wall so you see them often. Each topic could be in a different colour to help you remember them.

**Little and Often**  
Four 30 minute sessions each week is often better than two hours in one go.

**Resources**

- Exercise book containing key notes from your lessons
- [www.mymaths.co.uk](http://www.mymaths.co.uk)  
login: masefield  
password: jmhs1920
- past papers given to you by your teacher
- Revision aids
  - Kerboodle
  - Revision guide

**How to Revise Maths**

**Key Vocabulary**  
Make sure you understand the words used and know how to use them yourself. Try and learn one new definition a day.

**Method**  
Practise writing your methods. This is really important and can gain valuable marks in the exam.

**Questions, questions, questions!!**  
Do plenty of questions, especially worded ones to improve your comprehension of what is being asked. Start with using all your resources to help you and slowly reduce them so that you are doing them using your gained skills.

**Ask, ask, ask!!**  
Ask your teacher to explain any questions you do not understand, no matter how often, we are here to help.
