Subject Curriculum Overview for Academic Year 2022/2023

How parents can support learning in the subject this academic year

The best way to support students with their careers knowledge this term is to help them decide on their post-16 choices before the end of the year. Our own sixth form, as well as local colleges will be holding open events for parents and carers to attend with students. We will provide open evening dates as often as we can but attending many of these will help students to make an informed decision that best fits them.

Parents and carers can also access the Start website at home with students from the Careers page of the JMHS website, or simply by searching "Start Careers" in Google.
