## Subject Curriculum Overview for Academic Year 2022/2023

### How parents can support learning in the subject this academic year

Parents and carers can support their students with Careers by talking at home about what it is they do, or how they reached where they are today in their journeys. This can include being honest about successes and failures, giving advice about what to avoid, as well as what to do in order to succeed. When students are working on ways to improve their productivity and life management skills, any support at home would greatly improve a student's ability to work and manage stress levels.

Parents and carers can also access the Start website at home with students from the Careers page of the JMHS website, or simply by searching "Start Careers" in Google.
