

Independent Study

In Biology you should...

1. After each lesson

- Check your knowledge organiser to review what new content has been taught
- Write up your notes, using the relevant pages of the text book to add additional information or annotations
- Read through the relevant page in the text book, use them and answer the text book questions

2. Weekly

- Complete tutorial questions relevant to the taught content
- Complete the workshop questions relevant to the taught content
- Complete the discussion questions and write ups of practical done in lesson (when relevant)

3. Fortnightly

4. Termly

- Revise topics you are less confident with using the knowledge organisers to help identify these
- Seek further guidance from your teacher on what to focus on if you are unsure
- Ensure notes are kept in order within a folder for half termly folder checks
- Revise for half termly tests that will be used to assess your progress and understanding

5. Throughout the year

Complete exam style questions and past papers with and without notes to help you improve exam technique.

OCR papers can be found:
