Dataface Club -

What if you could take boring data and turn it into something amazing—something that tells a story, sparks ideas, or inspires change?

What if you could learn the skills to find the hidden messages in data, then use your creativity to share them in a way that makes people stop and think?

This cross-curricular club (Computing and DT) will teach Y8 and Y9 students key data analysis techniques using a variety of datasets, develop vital problem-solving skills, as well as supporting them to come up with creative ways to display their findings.

No prior computing expertise necessary.
Imagination obligatory.

Year 8 and Year 9 Only
Dataface
 Bringing data to life
 Mondays 3.25 – 4.25pm in Rm 41

Are you a data detective?

Cross-department club – Computing & DT

- Discover how to analyse data to find hidden stories
- Build skills on a range of datasets
- Present your findings in creative ways

Starting Jan 13th
