Rotation 'A' END POINT: Learn about architecture and structures to design and make a sustainable living model with lighting Architecture and Structures Students will: Know how to safely and correctly use equipment such as craft knives Earn how structures are built to withstand forces such as tension, torsion and compression and recognise different structures Be able to apply structural knowledge to design a bridge to withstand forces Understand how levers and pulleys work in a structure and recognises structures that utilise these mechanisms Learn about a range of architectural movements and architects including Bauhaus, brutalist, modern, Islamic Frank Lloyd Wright, Thomas Heatherwick and Zaha Hadid. Learn how biomimicry can be used in architecture design to influence and develop designs Learn on CAD how to design housing using Sketch up Understand the importance of sustainability within architecture Be able to design their own sustainable living project Learn the importance of model making within design technology and understand how to make a scaled down product Broaden knowledge of available materials including materials Be able to create an electrical circuit within model for lighting with an input, output and a power source Be able to solder components to create a working circuit	Subject: Design	Technology /Textiles/ Cooking & Nutrition	Year Group: 9	TERMLY ROTATION
Itiving model with lighting Architecture and Structures Students will: Know how to safely and correctly use equipment such as craft knives Learn how structures are built to withstand forces such as tension, torsion and compression and recognise different structures Be able to apply structural knowledge to design a bridge to withstand forces Understand how levers and pulleys work in a structure and recognises structures that utilise these mechanisms Learn about a range of architectural movements and architects including Bauhaus, brutalist, modern, Islamic Frank Lloyd Wright, Thomas Heatherwick and Zaha Hadid. 	Be able to safely work within the textile room	art,	understanding of key
	 Learn how to use a sewing machine to perform simple stitches and 		learning points.
	techniques		
	 Learn how to use different types of hand equipment specific to the textiles 		
	room		
	Be able to research a range of festivals and the costumes or clothing that		
	are typically worn		
	 Learn how to create fashion drawings using a range of design techniques 		
	suitable for a festival		
	 Learn about what is upcycling and why this is important in regards to 		
	increasing a products longevity		
	 Demonstrate how to upcycle a product to meet a set brief 		
	 Learn about the evolution of textile products to reinforce a cause, such as 		
	miners' quilts and protest flags		
	 Learn and demonstrate how how to print a range of surface decoration 		
	techniques such as block and foam printing, stencilling, lino ombre paint		
	techniques		
	 Learn a range of surface decoration dyeing techniques such as marbling 		
	and batik		
	Be able to create a 3D textile product of a festival kite		
	Learn to reflect, evaluate and develop, throughout the design and		
	manufacturing process.		

Rotation 'C'

Food Preparation & Nutrition

END POINT: Will confidently and safely prepare and cook a range of food dishes focussing on hygiene, safety, different methods of cooking and dish finishing techniques

Students will:

- Know what the term 'food sustainability' means.
- Know what factors affect food sustainability.
- Know the rules of making shortcrust pastry.
- Know the three types of egg production systems in the UK.
- Will know at least three freedoms from the animal welfare act.
- Will understand the advantages and disadvantages for each egg production system.
- Will understand the different types of food poisoning and how it may occur, including knowledge of 'pathogenic bacteria' and 'binary division.'
- Know the four important temperatures and what they relate to in the kitchen.
- Know the basic responsibilities of an Environmental Health Officer (EHO).
- Understand what a risk in the kitchen is and know what the term 'due diligence' means.
- Know and understand the term 'protein denaturation.
- Have an understanding and overview of what the Hospitality and Catering industry is, who it serves and what the Main elements of it are
- Practical dishes cooked: Jam tarts, Apple jalousie (Rough puff pastry),
 Thai green curry, swiss roll, Chilli con carne, Set cheesecake, Hot and sour
 seafood broth, Oriental spiced meatballs, Gougeres (Choux pastry), Garlic
 flat bread, Stuffed chicken breast.

Binary fission, campylobacter, coeliac, coagulation, contaminated, microbiological, pathogen, production, salmonella, sustainability
Analysis, Diligence, denaturation, hydration, umami, characteristic, commercial, concentrated, diabetes, hospitality, lactose, residential, Proving, Kneading, Enriched, Aeration, ambient, beverage, canapes, conduction, convection

Formative assessment, checking understanding & progress during each lesson.

Hand written summative assessment used termly to assess understanding of key learning points.

How parents can support learning in the subject this academic year

- Support independent practical skills by practising recipes / encouraging cooking dinner.
- Support independent practical skills by helping with household DIY / using tools to manufacture ideas within the home.
- Practise using subject specific vocabulary in a sentence.
- Watch cooking, design and manufacturing programmes to encourage enthusiasm and motivation within these subjects.
- Acknowledge and discuss the benefits of these subjects within the wider careers industry, supporting future aspirations.
- Encourage excellent page presentation and explore / research during creative tasks.

Points to note

This is the third year of the KS3 curriculum - Years 7,8 and 9study a different Technology specialism each term. There are approximately 12 weeks of study for DT, textiles and cooking & nutrition. We welcome students taking their products home with them at the end of the rotation, and food at the end of each practical lesson. Whilst we supply materials for DT and textiles we will ask for a voluntary contribution. Cooking ingredients should be purchased by yourselves, and will be uploaded to epraise a minimum of 2 days before they are needed in school.
